

‘Why was I born the person I am?’ ‘If the person I am had never been born would I have been born as someone else?’ ‘What happens to me when I die?’ ‘Have I lived before?’ In this easy-to-read book, the reader is taken on a journey in search of answers to these and other profound questions about human existence. By means of a series of philosophical questions, logical puzzles, thought experiments and meditations, and with strict adherence to scientific knowledge, the author guides the reader to clear answers to these questions. Answers that have extraordinary consequences for how we understand our lives and the basis of our morality.
